

HEBEL® Systems

Hebel® AAC wall systems are very popular in the Australian building industry due to the reduction in overall wall thickness, speed of construction and the acoustic and fire resistant properties.

Trafalgar Fire is committed to innovation within the passive fire industry developing new products and existing technologies, specifically designed to maintain the fire resistance level (FRL) of service penetrations through Hebel® systems.

HEBEL® Systems

COMPLIANCE WITH THE NATIONAL CONSTRUCTION CODE (NCC)

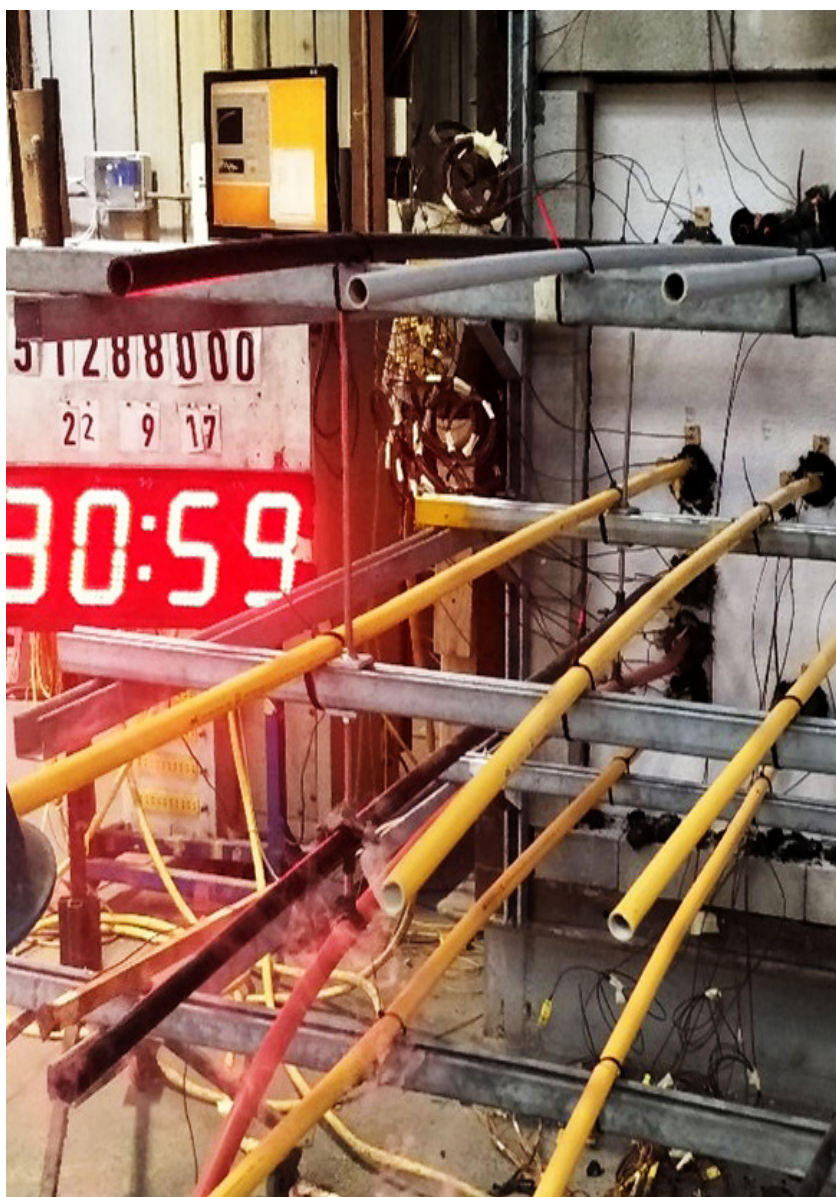

Formerly known as BCA

Hebel® AAC wall systems are very popular in the Australian building industry due to; the reduction in overall wall thickness, speed of construction and the acoustic and fire resistant properties.

Trafalgar Fire is committed to innovation within the passive fire industry developing new products and existing technologies, specifically designed to maintain the fire resistance level (FRL) of service penetrations through Hebel® systems.

Hebel® is an Aerated, Autoclaved Concrete (AAC) proprietary panel wall system. AS1530.4 requires walls & shafts made of Hebel® to be fire-tested to determine the FRL of the specific service penetration. Assessments based on other wall types do NOT comply with Schedule 5 of the National Construction Code (NCC). The Trafalgar Fire systems in this document have been fire tested and approved specifically for use in Hebel® wall systems, providing full compliance with the NCC.

To maintain market leadership, Trafalgar Fire stay up to date with the latest technologies and trends in passive fire protection and contemporary construction techniques. We are 75 years strong and still innovating.

FyreFLEX® Sealant

Trafalgar Fire's FyreFLEX® Sealant is a water based, low VOC and environmentally friendly fire-rated sealant with intumescent properties which makes it perfect for fire stopping cable and metal pipe penetrations through fire rated barriers.

FyreFLEX® is the one of the most fire tested sealants in the market with more than 30 fire and acoustic tests, and assessments spanning over 30 years. FyreFLEX® has been approved for use in a large range of control joint or firestopping applications required under the National Construction Code (NCC).

KEY FEATURES

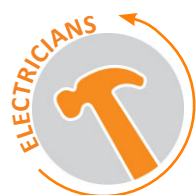

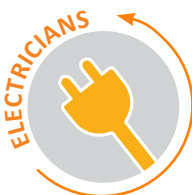

- NCC 2022 ready – fire tested and approved in accordance with AS1530.4 and AS4072.1
- Non-Toxic
- Water-based allowing for easy clean-up
- Excellent adhesion properties
- Tested and compliant in single layer plasterboard, Hebel® and Speedpanel® walls.
- Approved for use in both walls and floors

APPLICATIONS

Builders	Control and Expansion Joints
Electricians	Electrical Cables Data Cables
Active Fire	Steel Sprinkler Pipes TPS Fire Cables
Plumbers	Copper Pipes Steel Pipes

TRADES

FyrePEXTM HP

FyrePEXTM High-Performance Sealant is a graphite water-based intumescent mastic sealant that is used for fire stopping of service penetrations through fire-rated walls and floors to prevent the spread of fire for up to 2 hours.

Installation Video

KEY FEATURES

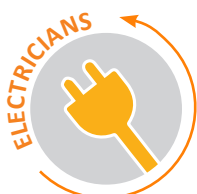

- Specifically designed for water and gas PEX pipe penetrations
- Also suitable for HVAC&R services
- Quick and easy to apply and install
- FyreSHEATH option helps reduce wastage
- Tested for SpeedPanel, Hebel and plasterboard walls
- Non-toxic & Green star rated for low VOC
- Water based for easy clean up
- Tested and approved in accordance with AS1530.4-2014 and AS4072.1

APPLICATIONS

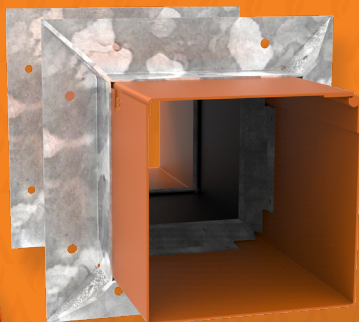

Plumbers	PEX pipes PEX-AL-PEX pipes Insulated Steel Copper
HVAC&R	Pair coil (single or in clusters of 3)
Electricians	Power Data cables Conduits

FyreBOXTM

Mini

The FyreBOXTM Mini and Maxi are a retro-fit multi-service penetration system designed to prevent the spread of fire through small or large service penetrations, in the smallest footprint possible. FyreBOXTM has been tested rigorously with a range of mixed service types and bundles in common wall and floor types and is one of the most fire tested products in the world, with industry leading FRL's of up to -/240/240 (system specific).

KEY FEATURES

**NEW IMPROVED
FYREFLANGE**

- Allows multiple and mixed services to pass through one opening
- Mixed services approved in any quantity or configuration
- Retro-fit or new construction
- Space saving, eliminates the need for 200mm separation between adjacent services
- Tested in Hebel®, single/ double layer plasterboard, Speedpanel® and many other common wall/floor systems.
- Fire tested in independent laboratories
- Thoroughly tested to AS1530.4-2014

APPLICATIONS

Electricians	Power Data cables Conduits
Plumbers	Steel and Copper pipes PVC pipes PEX pipes PEX-AL-PEX pipes
HVAC&R	Insulated pipes
Active Fire	Sprinkler pipes Fire cables

FyreSHIELD™

FyreSHIELD™ is a proudly Australian made access panel system which has been designed and tested to be built into partition walls and riser shafts.

With improved fire and acoustic performance while maintaining the signature Trafalgar Australian-made quality, the FyreSHIELD™ is the only access panel worth specifying and installing!

KEY FEATURES

- Fully fire tested -/90/60 FRL's in accordance with AS1530.4:2014
- Two way fire protection
- Fire tested in a range of common wall types and shafts
- No calcium silicate blocks required
- Australian made quality
- Fully concealed hinges
- Budget lock as standard

APPLICATIONS

- 60 minute walls (-/60/60 FRL)
- 90 minute shafts (-/90/30 FRL)
- Hebel
- Speedpanel
- Plasterboard
- Pronto Panel
- Concrete/Masonry

FyreCHOKE

Conduit Collars

Trafalgar Fire FyreCHOKE Conduit Collars are designed to provide maximum protection against the spread of fire through walls and floors that are penetrated by plastic conduits, plastic pipes. FyreCHOKE Collars are simple to install, simply retro-fit around the service and fix to the wall or floor.

Click to Watch
Installation Video

KEY FEATURES

- Intumescent fire stopping specifically for plastic pipes and conduit penetrations.
- Actively expands during fire conditions, forms a tight seal and prevents the spread of fire through the service penetration.
- Fire tested in a range of wall and floor systems including a wide variety of service types.
- Stainless steel construction
- Simple design allows for quick and easy installation of the collars.
- Sizes 25-40mm

APPLICATIONS

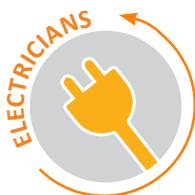

Electricians

Data NBN Conduits
Electrical Conduits

Plumbers

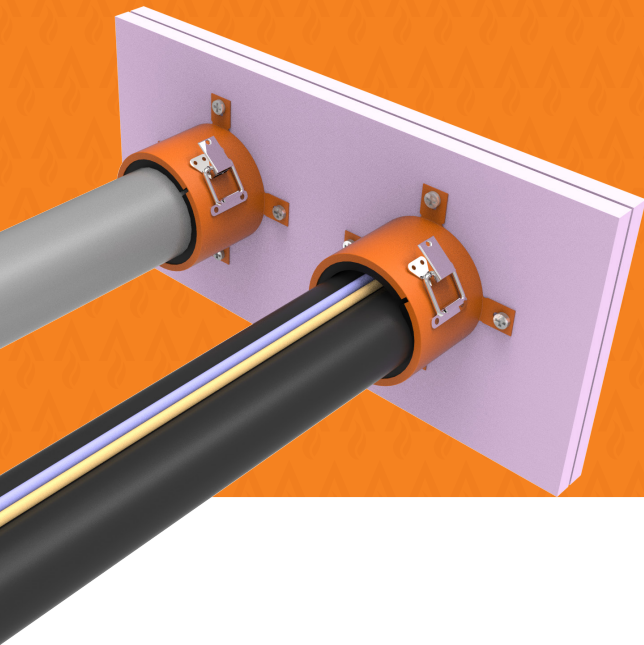

PVC pipes
PEX pipes
PEX-AL-PEX pipes

KEY FEATURES

- Proudly Australian made
- Quick and easy installation
- Used in floors and walls
- Tested to AS1530.4-2014
- Removable
- Suitable for cables and metal pipes
- Approved with Speedpanel® and Hebel® walls
- Tested with Trafalgar Fire TWRAP™ for increased insulation ratings small medium and large, to suit various applications

WHAT IS FyrePLUG®?

- Tested for a range of modern services and fire barriers to AS1530.4-2014
- Ideal for small to medium size penetrations for temporary fire stopping
- Undisturbed provide a permanent fire protection as required by the National Construction Code (NCC)
- Fire tested for wall and floor openings with other Trafalgar Fire systems and with an impressive range of service penetration types

TRADES

TWRAP™

Fire Penetration Wrap

TWRAP™ is a 25mm thick foil-faced, fire protection wrap that has been engineered to provide insulation performance on service penetrations as required by the National Construction Code (NCC) and tested in accordance with AS1530.4-2014.

KEY FEATURES

- Simple fixing requirements
- Up to 3 hours fire insulation performance
- Suitable for cables, cable trays and metal pipes
- Fully encapsulated wrap system
- Bio-soluble fibres
- Easily identified on site for certification
- Easy to wrap around smaller services
- Allows for adds moves and changes during the life of the building
- Tested for use with a range of Trafalgar Fire's penetration systems

WHAT IS TWRAP™?

- 25mm thick foil-faced, fire protection wrap
- Used with penetration sealing systems
- Aluminium foil, fiberglass-reinforced outside layer completely encapsulates the core
- Strong - additional handling strength and tear resistance
- Resists mould growth
- Thoroughly tested to AS1530.4-2014
