

PLUMBERS

FyreBOX™ Slab-Mount

The FyreBOX™ Slab Mount Bambino is specifically manufactured for individual trades to simplify the job allowing installation of services before the wall construction, providing predictable site costs and a reliable method of fire stopping, with independence from other contractor schedules.

A proudly Australian made passive fire penetration system made for trades.

NCC compliant
NCC 2022 ready!

Key Features

- Reduced separation requirements between pipes
- Allows for multiple pipes in the one penetration
